

WASH HANDS AND SANITIZE SAFELY

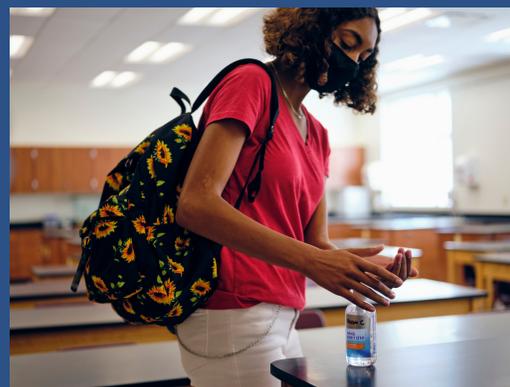

Ingestion of hand sanitizer is a potentially serious poisoning! Call **1-800-222-1222** for immediate help, 24/7.

Frequent use of hand sanitizer with at least 60% ethanol (or 70% isopropyl alcohol) is recommended by the CDC to limit the spread of coronavirus and other infections.

However, these products can be dangerous if someone drinks the liquid or gets it in their eyes.

Keep hand sanitizers out of reach of children and do not allow children under the age of 6 to carry their own.
